

## Handmade Jewelry

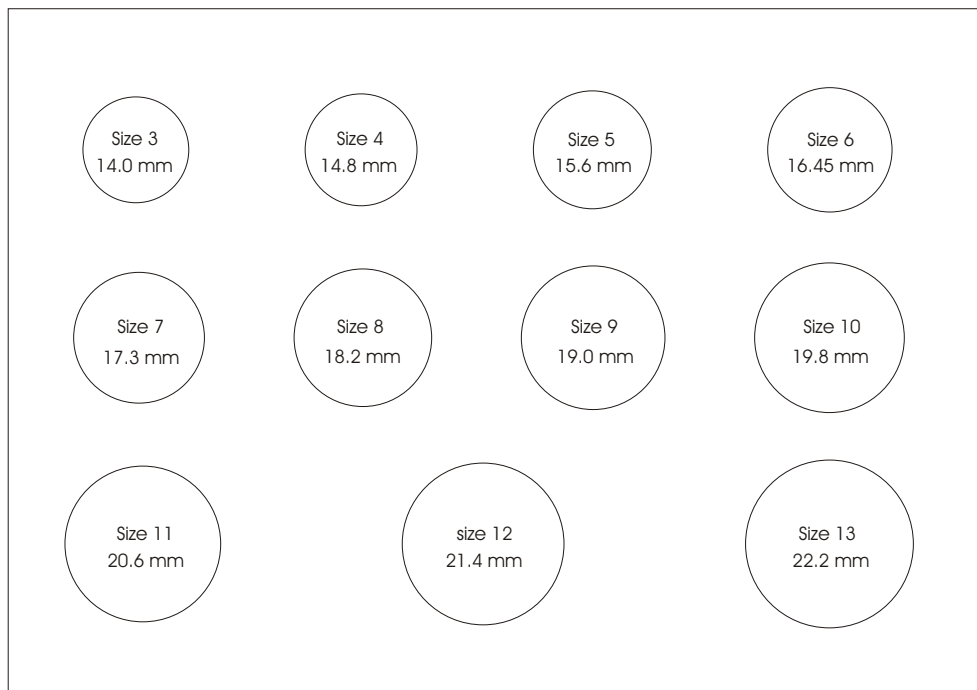

### Determining your ring size

1. Before you print this page, make sure that the "page scaling" on your printer is set to "none".
2. After printing, measure the bar on the right and make sure it is exactly 2" long.
3. If the measurement is not 2" check that you are printing the page at full size.

### US Ring Sizes

To find out what size ring you require, select a ring that fits your finger and place it over the circles below. Try and match the inside of the ring to the circle that is nearest in size.

### Another way to determine your ring size

1. Wrap a piece of paper around the finger you wish to measure.
2. Allow about 1 cm for overlap then secure the paper with some sticky tape.
3. Slide the paper ring off your finger and cut it with scissors.
4. Measure the length off the paper in millimeters
5. You should then divide that number by 3.14 to get the diameter of your finger.
6. Compare this information with the ring chart above to get the size of ring you need for your finger.
